PRESS RELEASE No 3/2025

SHIELD V: Over 3.4 million pills seized in Operation Targeting Counterfeit Medicines

Over 3.4 million pills have been seized as part of Operation SHIELD V, in which the European Anti-Fraud Office (OLAF) has played an essential coordinating role. This annual operation targets the misuse and distribution of counterfeit medicines, doping substances, illegal food or sports supplements, and counterfeit COVID-19 medical supplies.

In its fifth consecutive year, OLAF facilitated the efforts of the Member States customs authorities in ensuring the integrity of the European market. The coordinated actions of the customs authorities resulted in the seizure of significant quantities of illicit goods, including: 3,4 million pills, over 59.000 packages (sachets, sprays, packs, pens), 1,510 vials (ampoules, flasks) and 272 pieces of medical devices.

Joint Effort across 14 Member States

Operation SHIELD V included the active involvement of customs authorities from 12 EU Member States, namely Austria, Bulgaria, Denmark, Spain, Greece, Croatia, Ireland, Italy, Lithuania, Portugal, Slovenia, Slovakia, and Italy's Guardia di Finanza. This collaborative effort was further supported by relevant rights holders, ensuring that counterfeit goods were accurately identified and swiftly intercepted.

"Traffickers recklessly jeopardise people's health to turn a quick profit, a reality we cannot ignore. To protect European citizens, cooperation is essential. By combining efforts, OLAF, Europol, and national customs authorities have safeguarded European consumers from dangerous health products," said Ville Itälä, Director General of OLAF.

Operation SHIELD continues to exemplify the importance of coordinated action in tackling illegal activities that endanger public health and undermine legitimate businesses. OLAF's role ensures that these threats are met with a unified and effective response, safeguarding the health and wellbeing of citizens across the European Union.
